NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation.

Charging the bluetooth headphones

Connect the small end of the Micro USB cable to the charging port on the headphones. Connect the large end of the Micro USB cable to your computer's USB port or an AC adaptor(not included). The LED indicator light turns RED when charging.It will turn off when fully charged.

Note: If you would like to connect the headphones to another device, you must unpair the headphones from the currently paired device first. On your device's bluetooth settings, select “ BTELITE ” then select “unpair”.When the headphones have been unpaired, it automatically goes into pairing mode again.
